For Paper and Cardboard Industries L.L.C

COMPANY PROFILE

2026

Sanabel Al-Ataa Paper and Cardboard Manufacturing Company

Sanabel Paper and Cardboard Manufacturing Company is a leading Jordanian industrial company specializing in the manufacturing and recycling of paper and Cardboard, as well as the production of sanitary paper. Operating under Al Khattab Industrial Group, the company is driven by a strong commitment to sustainability, environmental responsibility, and industrial excellence.

Sanabel adopts environmentally responsible production practices based on paper recycling to deliver high-quality packaging and industrial materials, while reducing environmental impact and supporting sustainable industrial growth.

The company operates in compliance with the highest Jordanian and international standards across all production stages and invests in advanced technologies and sustainable solutions that support the circular economy and enhance environmental efficiency.

Recognized as a trusted partner for local and regional institutions, Sanabel continues to expand its presence across regional markets by offering competitive products that balance quality, sustainability, and cost efficiency.

Geographic Reach & Export Markets

Based in Jordan, Sanabel Al-Ataa benefits from a strategic geographic location that supports efficient logistics and global trade access. The company serves the Jordanian market, the regional Middle East market, and actively exports to international destinations worldwide, including Australia and the United States of America.

Sanabel Al-Ataa targets global export markets and continues to expand its international footprint, leveraging Jordan's strategic position as a gateway between regional and global supply chains.

Core Production Lines

Sanabel Al-Ataa **operates two main production lines that represent the foundation of its industrial activities:**

1

Paper & Cardboard Recycling Line

Focused on the recycling of paper and cardboard waste and the production of high-quality paper and cardboard materials for packaging and industrial use.

2

Sanitary Paper Production Line

Dedicated to the production of raw sanitary paper as well as consumer sanitary paper products, manufactured in accordance with quality, hygiene, and safety standards.

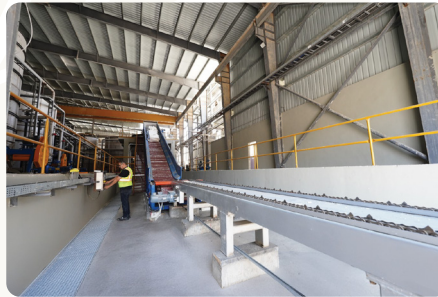

Our Factory

Sanabel Al-Ataa's paper and cardboard manufacturing facility is among the leading recycling-based factories in Jordan. The factory combines advanced production technology with local industrial expertise to deliver high-quality paper, cardboard, and sanitary paper products that serve a wide range of industrial and commercial sectors.

Located within Al Khattab Industrial Group, the factory features fully integrated production operations, including raw material reception and sorting, pulping and processing, forming and drying, and the production of finished paper and cardboard rolls ready for use or further conversion, in addition to the production of raw sanitary

Vision

To become the leading company in Jordan and the region in the manufacturing of sanitary paper and cardboard, and to be among the pioneers in the other industries and services we provide. Our goal is to set a benchmark for environmental sustainability by supporting a closed-loop manufacturing approach, enhancing efficiency, fostering innovation, and promoting waste recycling.

Values

- Excellence, Quality, and Customer Satisfaction Focus
- Teamwork and Collaboration in the Service of the Business and the Nation
- Sustainability, Efficiency, and Recycling
- Leadership and Innovation

Why Sanabel Al-Ataa?

1

Responsibility

We believe that true quality begins with responsibility — toward our customers, our partners, and the environment.

2

Trust & Reliability

Choosing Sanabel Al-Ataa means partnering with a company that values transparency, consistency, and long-term collaboration.

3

Environmental Commitment

By recycling paper waste into strong, efficient, and reliable products, we help build a cleaner and more sustainable future for Jordan and the region.

4

Industry Expertise

With accumulated experience and strict adherence to modern industrial and environmental standards, Sanabel Al-Ataa is a trusted name in the paper .

5

Sustainability

Our production processes integrate recycling, innovation, and quality management systems to ensure operational efficiency while reducing.

6

National Contribution

Through our sustainability-driven vision, we actively support the national economy and contribute to Jordan's transition toward a green industrial future.

Technology & Innovation

Sanabel Al-Ataa relies on advanced production technologies that combine industrial efficiency with environmental sustainability. The factory is equipped with modern production lines designed to meet the highest international standards in paper and cardboard manufacturing.

Our manufacturing process includes advanced raw material sorting systems, pulping and filtration stages, forming and drying processes, and continuous digital quality monitoring to ensure consistent product specifications.

Key technological features include:

1

Closed-loop water treatment system (DAF System) for water recycling and reduced industrial waste environment.

2

Smart recycling technologies capable of processing various types of paper waste.

3

Energy-efficient motors and equipment to optimize power consumption.

4

Digital quality control systems to monitor production performance and product consistency. These technologies reflect Sanabel Al-Ataa's commitment to developing a green, efficient, and competitive paper industry in Jordan.
